Installation Instructions - Updated as of 09/30/20

Figure 1 EAS Bracket Pos

Step #1

Position the Smartop (in closed position) on the spa making sure that all four corners are properly positioned and square on the spa.

Step #2

Attach the EAS handle to the EAS bracket using the supplied 5/16 x 1-1/4" button head socket bolt (see Fig. 1).

Step #3

Attach the Vanish XL pivot arms to the Smartop using the supplied button head socket bolts and let the assembly hang freely (see Fig. 2). Note: Make sure to run the bolts from the inside out. The locknuts need to be facing outwards. Also, make sure to use the supplied plastic washers as a spacer in between the metal plate on the pivot arms and the Vanish XL cover mounting bracket. Do not overtighted bolts, the pivot arms must rotate freely.

Step #4

Swing the Vanish XL bracket assembly forward making sure the two pivot arms rest against each other (see Fig. 2). Attach the Vanish XL bracket assembly to the spa cabinet using the supplied #10 x 1-1/2" mounting screws. Note: Make sure to put downward pressure on the Smartop when attaching the Vanish XL bracket assembly to the spa cabinet to ensure the Smartop is making a good seal with the acrylic of the spa.

Step #5

Repeat steps 2, 3 & 4 for the opposite side of the spa.

Step #6

To attach the shocks to the bracket assembly, partially open your Smartop cover and snap the shocks onto the appropriate ball studs (see Fig. 3). Note: Make sure the black body of the shock is pointing towards the middle of the Smartop.

Step #7

Open the Smartop so it is in the fully upright position. Using the supplied $\#10 \times 1-1/2$ " mounting screws, finish attaching the Vanish XL bracket assembly to the spa.

Step #8

Attach the Vanish XL cover plate to the bracket assembly using the supplied self-tapping screws. Next, thread the 3/8 x 3/4" hex cap bolt through the hole in the cover plate that lines up with the rear pivot arm (see Fig. 4). Note: Do not overtighten hex cap bolt.

Smartop VanishXL 200930 Page 1

Step #9

Connect the Sure Lock latch to the latch catch. While pushing down on the Smartop, position the Sure Lock latch on the side of the spa and mark where the latch base rests against the spa skirting. Attach the Sure Lock latch to the spa skirting, where marked, using the supplied self-tapping screws (*see Fig. 5*).

Step #10

If the thermal seal on the underside of the Smartop does not completely seal around the control panel of your spa, an additional thermal seal control pad has been included with the Smartop. Close the Smartop and determine the position of the thermal seal pad. Open the Smartop cover onto itself, dry thoroughly and remove the backing of the thermal seal pad and attach it to the underside of the Smartop in the desired position (see Fig. 6).

Operation of your Smartop Cover

1) Fold the first half of the Smartop cover off the spa. While gripping the EAS handle, motion the Smartop cover into it's vertical upright position.

A(L)	L'io nancie, motion die omartop cover into it s vertical aprigni position.
